"How to Make a StunGun"

So you want to Zap the shit out of someone.
Well I have the thing just
for you. It delivers a nice Shock of 75,000
Volts and causes muscle spasms.
Don't try this on your self (Dumb Shit).
To get the parts go down to your
local RADIO-SHACK. All of these parts
should be there, if not ask them
to special order them for you. I think
there is NO additional cost.
As always DONT change the author of this to
yourself, cause you didn't
write this shit. And if you got this file by
itself, then get Xoo's
CookBook. You will surely have a fun time...

X0Oo.....Xoo.....
oO0X

PARTS
=====
All resistors are 1/2 watt.Abbrv. as R1 or R2.

R1 & R2 100,000 ohm's resistors!
R3 & R4 500,000 ohm's resistors!

DIODES:D1-D4
Use a 75 PIV BRIDGE RECTIFIER or 4 1N9004's 300 VOLTS.

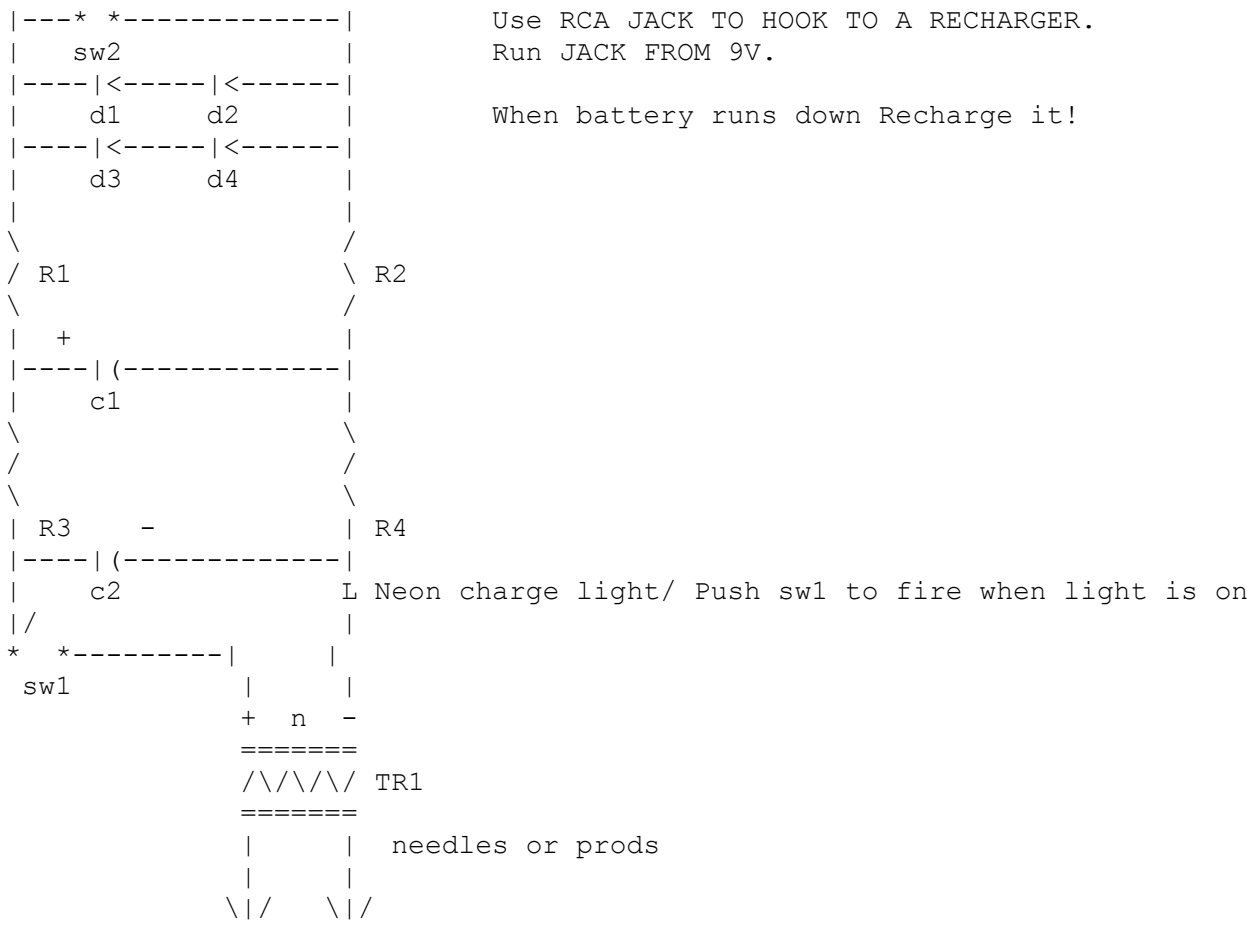
Capacitors:
C1&C2 4700uF electrolytic

TR1-STEP UP TRANSFORMER 55 uH AUDIO
---
2 250 volt AC DPST switch

A 9volt RECHARGEABLE/100 volt Neon lamp =L

A 9volt battery clip/MALE-FEMALE RCA JACKS

Some perf board,wire,solder



When this is built hold down sw2 until neon lamp lights. Then Stick it into
your victim. And press SW1 ,He will get a jolt. To shock mass amounts of people, go to your local swimming pool or beach, and make sure there are NO LIFEGUARDS around. Tape down sw2 and sw1 and throw it in the water all victims, including possible sealife will be electrocuted, and possibly killed. Make a hundred of them and throw them into an ocean...
